● ABOUT ME

Graduated as a Specialized Technician in Software Development, I am eager to apply my skills within a dynamic and innovative organization. Passionate about technology, I am proficient in HTML, CSS, JavaScript, PHP, and MySQL, as well as in the frameworks React.js, Next.js, and Laravel. This versatility allows me to quickly adapt to various projects and work environments. My certificate in professional English and my fluency in Arabic, French, and English are additional assets I aim to leverage. I am enthusiastic about taking on new challenges and actively contributing to the improvement and modernization of services.

To-Do App with React.js and Firebase

Overview

The To-Do App is a simple, responsive, and real-time task management application built using React.js for the frontend and Firebase for backend services like database, authentication, and hosting. It allows users to create, read, update, and delete (CRUD) tasks efficiently from any device with internet access.

Key Features

 Add Tasks: Users can input and save new to-do items.

 Mark as Completed: Users can mark tasks as completed.

 Edit Tasks: Modify task details inline.

 Delete Tasks: Remove completed or unwanted tasks.

 Real-Time Sync: All changes are instantly reflected using Firebase's real-time database.

 User Authentication (optional): Users can sign in with Google or email/password.

 Cloud Storage: Data is stored and synced in Firebase Firestore.

 Responsive Design: Works seamlessly on mobile, tablet, and desktop.

Tech Stack

Frontend : React.js

Backend : Firebase

Database : Firestore (NoSQL)
